Keynote Address: Slag carry-over and the production of clean steel
P.C. Pistorius 1

Wear analysis of tap-holes at two ferrochromium production furnaces
J.D. Steenkamp 11

Reduced metal loss to slag in HC FeCr production - by redesign based on mathematical modelling
S.T. Johansen and E. Ringdalen 29

Thermal assessment and identification of wear zones in a blast furnace hearth and tap-holes
H. Ghorbani, M. Al-Dojayli, and K. Chomyn 39

Improvements to the Anglo Converting Process (ACP) tap-block management
A. Hoosen, M. Sichone, and I. Rambiyana 49

Development, installation, and operation of a full-copper, deep-cooled slag tap-block for a six-in-line copper slag-cleaning electric furnace
B.N. Belford, P. Conradie, and T. Mwanza 57

Measurement of metal temperature during tapping of an industrial FeSi furnace
M. Ksiazek, H.M. Hustad, A. Nymoen, J. Holtan, S. Grådah, S. Kaukonen, and M. Tangstad 83

More health-friendly materials for the tapping area
L.H. Lindstad 95

Non-water-based metal tap-hole cooling – a safer alternative
M.W. Kennedy, A. MacRae, P. Nos, and F. Olesen 101

Tapping procedures in silicon production, and the role of female tapping operators
M.B. Folstad, M. Tangstad, E. Ringdalen, R. Fredriksli, and S. Dalum 111

Keynote Address: Managing the tap-hole life-cycle at five submerged arc furnaces producing silicomanganese at Transalloys
J.J. Sutherland and J.P. Gous 117

Phase effects in tap-hole flow – a computational modelling study
Q.G. Reynolds, J.E. Olsen, M.W. Erwee, and O.F. Oxtoby 133

Tap-hole maintenance and management on furnace 10 at Eramet Norway Porsgrunn
J.E. Davidsen and M. Honstad 155

Excavation of SiMn-Furnace
E. Ringdalen and M. Ksiazek 167

Multiphase flow modelling of lancing of furnace tap-holes: validation of multiphase flow simulated in OpenFOAM®
M.W. Erwee, Q.G. Reynolds, J.H. Zietsman, and P.J.A. Bezuidenhout 179

Numerical simulation – a tap-hole refractory design study
D.R. Kreuzer, H.U. Marschall, and C. Wagner 189

Optimizing tap-hole performance using a risk-based asset management strategy
S. Faux, C. Walker, F. Stober, R. MacRosty, M. Darini, and B. Kargutkar 205

Temperature field at the tap-hole in a manganese furnace – a computational modelling study
J.E. Olsen, Q.G. Reynolds, and M.W. Erwee 223

Tap-hole opening: Advances and improvements
D. Morales, C. Morales, and S. Nuñez 231
