S30 Surface Mining 2002—Modern Developments for the New Millennium
S32 ISSA/CHAMBER OF MINES CONFERENCE—Mines and Quarries: Prevention of Occupational Injury and Disease
S33 ISRM—Technology Roadmap for Rock Mechanics
S34 Heavy Minerals Conference 2003
S35 Safety in Mines Research Institutes
Foreword

There is a large and steadily growing body of knowledge already available on molten slags, fluxes and salts, with approximately one journal paper on these appearing daily. I trust that this volume of nearly 130 papers, the proceedings of the 7th International Conference on Molten Slags, Fluxes and Salts, will provide useful additions to and overviews of current knowledge, and that the papers in this volume will inspire you to continue to use and expand the knowledge on slags, fluxes and salts, in new and improved applications.

The Slags Conferences are unusual in that they do not ‘belong’ to any particular organisation—every four years, the conference is presented by a different host organisation, in a different part of the world. We are grateful to the Advisory Board for their inputs into the arrangements, ensuring that we retain and build on the spirit of the previous six conferences.

Thanks are due to the Organising Committee for bringing together this impressive collection of papers. Special thanks go to the staff of The South African Institute of Mining and Metallurgy, particularly Karen du Toit and Nazli Mamdoo, for doing the bulk of the practical work with regards to receipt of the papers and arranging for refereeing, and Dawn van der Walt and Zuliakha Malgas for the production of this well-edited volume.

Chris Pistorius
Chairman
Organising Committee
SESSION 3C: INDUSTRIAL APPLICATIONS

Keynote Address: Melting of platinum group metal concentrates in South Africa
J. Nell .................................................. 165
Factors affecting nickel recovery from slags produced during platinum smelting
L. Andrews ........................................... 171
Copper losses to slags obtained from the E1 Teniente process
I. Imris, M. Sanchez, and G. Achurra ....................... 177
Feasibility of recovering metals from associated slags

SESSION 4A: THERMODYNAMICS AND EQUILIBRIUM

Physico-chemical properties and transition metal complex formation in alkali pyrosulphate and hydrogen sulphate melts
S.B. Rasmussen, H. Hamma, K.M. Eriksen, G. Hatem, M. Gaune-Escard, and R. Fehrmann  .................................................. 189
CaF₂ solubility in NaCl-KCl salt flux for aluminium recycling
A. Sydykov, B. Friedrich, E. Milke, and A. Arnold .................................................. 197
Heat capacity measurement of molten NaNO₃-NaNO₂-KNO₃ by drop calorimetry
M. Kawakami, K. Suzuki, S. Yokoyama, and T. Takenaka .................................................. 201
Phase equilibria in the Fe-Zn-O system at conditions relevant to zinc sintering and smelting
R. Hansson, P.C. Hayes, and E. Jak .................................................. 209

SESSION 4B: VISCOSITY

Gilding cylinder method for the viscosity measurement of molten salts, slags and glasses
Y. Shiraishi and Y. Sakurai .................................................. 215
Liquidus temperature and viscosity of melter slags
M. Somerville, S. Wright, S. Sun, and S. Jahanshahi .................................................. 219
Viscous behaviour of CaO-SiO₂-AI₂O₃-MgO-FeO slag
Y.S. Lee, J.R. Kim, S.H. Yi, and D.J. Min .................................................. 225
The influence of Fe⁺/Fe²⁺ ratio on the viscosity of silicate slags
S. Wright and L. Zhang .................................................. 231

SESSION 4C: INDUSTRIAL APPLICATIONS

Keynote Address: Equilibrium interactions between freeze lining and slag in ilmenite smelting
P. C. Pistorius ........................................... 237
Experimental investigation of liquids temperatures of ISP slags
B. Zhao, E. Jak, and P.C. Hayes .................................................. 243
Sulphur bonding in solidified ladle slags
W. Posch, H Preßlinger, M. Mayer, K. Klepp, and H. Hiebler .................................................. 249
The effect of molten sodium titanate and carbonate salt mixture on the alkali roasting of ilmenite and rutile minerals
V. Tathavadkar and A. Jha .................................................. 255

SESSION 5: PLENARY ADDRESS

Unique functions of slags in steelmaking
R.J. Fruehan .................................................. 263

SESSION 6A: THERMODYNAMICS AND EQUILIBRIUM

Surface tension of Cu-O alloys at 1400 K
C. Nexhip, R. Davidson, and S. Sun .................................................. 271
Activities of Cu, Fe and Ni in Cu-Fe-Ni-S melts
S. Wright, S. Jahanshahi, and S. Sun .................................................. 277
Thermodynamic studies of FeO-containing slags and their impact on the ladle refining process
P. Fredriksson and S. Seetharaman .................................................. 285
TEM study of solid titanium oxides inclusions in steel melt at 1600°C
C.-T. Mutale, A.S. Tuling, and S.M.C. Verryn .................................................. 293
The effect of carbon in slag on steel reoxidation by CaO-SiO₂-AI₂O₃-MnO-FeO slags

SESSION 6B: REFRACTORIES

Keynote Address: Direct and indirect slag corrosion of oxide and oxide-carbo refractories
W.E. Lee and S. Zhang .................................................. 309
Impact of slag refractory lining reactions on the formation of inclusions in steel
K. Beskow, N. N. Tripathi, M. Nzotta, A. Sandberg, and Du Sichen .................................................. 321
Laboratory study of the interaction mechanisms between magnesia-chromite refractories and Al₂O₃-rich VOD slags
M. Guo, S. Parada, S. Smets, P.T. Jones, J. Van Dyck, B. Blanpain, and P. Wollants .................................................. 327
Interactions of two-liquid CaO-MgO-FeO-P₂O₅ slag with MgO refractories
T. Tamura and M. Hino .................................................. 337
Corrosion mechanism and kinetic behaviour of refractory materials in contact with CaO-Al₂O₃-MgO-SiO₂ slags
S. Jansson, V. Brabie, and L. Bohlin .................................................. 341

SESSION 8C: INDUSTRIAL APPLICATIONS

Keynote Address: Slag properties and design issues pertinent to matte smelting electric furnaces
R. H. Eric ................................................................. 531

Management of copper pyrometallurgical slags: giving additional value to the copper mining industry
M. Sánchez, F. Parada, R. Parra, F. Marquez, R. Jara, J.C. Carrasco, and J. Palacios ............................ 543

Magnetite behaviour in Peirce Smith converters slag at Ilo copper smelter plant, Peru
C. Morales, J. Palacios, and M. Sánchez .................................................. 551

Modelling of antimonial capacity in copper and nickel smelting slags
J.M. Font and R.G. Reddy .................................................. 557

SESSION 9: PLENARY SESSION

Fire and the art of metals—A short history of pyrometallurgy
F. Habashi ................................................................. 563

SESSION 10A: TRANSPORT/INTERFACIAL PHENOMENA

Observations of behaviour of oxide inclusions at molten slag/steel interfaces
G. N. Shannon, Y. Wang, S. Vantilt, B. Coletti, B. Blanpain, and S. Sridhar ........................................ 571

Experimental model study for separation and dissolution of liquid inclusions at the interface between steel and slag
M. Magnelöv, U. Sjöström, and Du Sichen .................................................. 577

The dissolution behaviour of selected oxides in CaO-SiO2-Al2O3 slags
B.J. Monaghan, S.A. Nightingale, L. Chen, and G.A. Brooks .................................................. 585

A study of dissolution of dense lime in molten slags under static conditions
S. Haji Amini, O. Ostrovski, and M.P. Brungs .................................................. 595

Rate of reoxidation of ultra-low carbon steel in contact with slag of various compositions
K.Y. Lee, J.M. Park, and C.W. Park .................................................. 601

SESSION 10B: MODELLING AND SIMULATION

Keynote Address: Thermodynamic models and databases for slags, fluxes and salts
A.D. Pelton ................................................................. 607

Structural dependence of alkali oxide activity in coal ash slags
M. Mueller, W. Willenborg, K. Hilpert, and L. Singheiser .................................................. 615

Modelling and prediction of reactions involving metals, slags and fluxes
H. Gaye and J. Lehmann .................................................. 619

Modelling of Al, Si, Mn and Ti partition between slag and Fe-Ni alloys
J. Lehmann, H. Gaye, and S. Witzke .................................................. 625

Prediction of SiO2-Al2O3-Cr2O3 complex inclusions in steel containing 16 per cent Cr-Si-Al-Mn

SESSION 10C: INDUSTRIAL APPLICATIONS

Keynote Address: Slags in ferroalloys production—review of present knowledge
L. Holappa and Y. Xiao .................................................. 641

An investigation into aspects of liquid phase reduction of manganese and silica containing slag
S. Gaal, K. Berg, G. Tranell, S.E. Olsen, and M. Tangstad .................................................. 651

Removing impurities from high carbon ferrochromium by treatment with slag mixtures
K.L. Kossyrev, A.V. Pavlov, and A.V. Dubachev .................................................. 659

Reduction of chromium oxide containing slags using CaC: injection
J. Björkqvall, S. Ångström, and L. Kallin .................................................. 663

Physical modelling of slag-metal dispersion
G. Akdogan and R.H. Eric .................................................. 671

SESSION 11A: SENSORS AND MEASUREMENT

Keynote Address: Alternative methods for in situ determination of iron oxide in steelmaking slags
K. Schwerdtfeger ................................................................. 679

In situ measurement of the oxygen activity of low carbon steel ladle slags
S. Smets, J. Janssens, B. Coletti, J. Plessers, B. Blanpain, and P. Wollants .................................................. 687

Spectroscopic analysis of slags—preliminary observations
T. Sowmya and S.R. Sankaranarayanan .................................................. 693

Solid-state 19F NMR on CaO-SiO2-CaF2 glasses
T. Watanabe, M. Hayashi, S. Hayashi, H. Fukuyama, and K. Nagata .................................................. 699

Preliminary microwave measurements on liquid slags
U. Malmberg, J. Björkqvall, J. Malm, and L. Bååth .................................................. 707
**SESSION 11B: MOULD FLUXES**

Keynote Address: The performance and properties of mould fluxes
K.C. Mills, A.B. Fox, R.P. Thackray, and Z. Li ................................................. 713
Continuous casting mould powder and casting process interaction: why powders do not always work as expected
V. Ludlow, B. Harris, S. Riaz, and A. Normanton ............................................ 723
Mould powder selection for thin slab casting
J.A. Kromhout, A.A. Kamperman, M. Kick, and J. Trouw .................................. 731
Decomposition of Li2CO3 in existence of SiO2 in mould flux of steel casting
J.-W. Kim, Y.-D. Lee, Y.-B. Kang, and H.-G. Lee .............................................. 737
Mould fluxes in continuous casting of steel-characterization and performance tuning
M. Görnerup, M. Hayashi, C.-Å. Dacker, and S. Seetharaman ............................. 745

**SESSION 11C: INDUSTRIAL APPLICATIONS**

Steel cleanliness and hydrogen in liquid steel
R. Dekkers, B. Blanpain, J. Plessers, and P. Wollants ........................................ 753
The role of metal and slag films stabilization phenomena with respect to clean steel
I. A. Minaev ............................................................................................................. 763
The control of inclusion composition to prevent rust formation on ferritic stainless steel
S. Kitamura ............................................................................................................. 769
Chemical and physical changes of cathode carbon by aluminium electrolysis
J. Hop, A. Store, T. Foosnaes, and H.A. Öye ....................................................... 775
Alternative electrolyte compositions for aluminium electrolysis
J. Thonstad and S. Rolseth ...................................................................................... 783

**SESSION 12A: SENSORS AND MEASUREMENT**

Keynote Address: Evaluation and control of iron and steelmaking slags through electrochemical FeO sensors
M. Iwase, A. Mclean, K. Katogi, Y. Kikuchi, and K. Wakimoto ........................... 787
Structural analysis of molten Na2O-NaF-SiO2 system by Raman spectroscopy and molecular dynamics simulation
Y. Sasaki, H. Urata, and K. Ishii ............................................................................. 797
Effect of properties of mould powder entrapped in molten steel in a continuous casting process

**SESSION 12B: MOULD FLUXES**

Keynote Address: Behaviour of continuous casting fluxes during heating and cooling
E. Brandaleze, E. Benavidez, L. Castella and J. Madias ........................................ 807
A test to determine crystallinity of mould fluxes
Z. Li, R. Thackray, and K.C. Mills ......................................................................... 813
Mould flux crystallization: a kinetic study
R. Carli and C. Righi ............................................................................................. 821

**SESSION 12C: MODELLING AND SIMULATION**

Keynote Address: Structure model and properties of alkali borate melts
Z. Zhang and R.G. Reddy ...................................................................................... 827
Calulation of phase diagrams for the CaO-CaF2 and CaO-BaO binary systems by using molecular dynamics
W.-G. Seo, D. Zhou, T. Hamano, and F. Tsukihashi ............................................. 835
Thermodynamic modelling of the Al2O3-CoO-CrO-Cr2O3-FeO-Fe2O3-MgO-MnO-NiO-SiO2-S system and applications in ferrous process metallurgy
S.A. Decterov, I.-H. Jung, E. Jak, Y.-B. Kang, P. Hayes, and A.D. Pelton .......... 839
