</table>
Crushing and grinding efficiencies, by T. K. Prentice, 189; Discussion, 213, 215, 216
Metals and metallurgy in the twentieth century, by G. H. Stanley, 235; Discussion, 264
Presidential Address—Research in Rand mining, by J. T. McIntyre, 3; Discussion, 31, 32
35, 37, 39, 40
Some aspects of ground movement (the Witwatersrand gold field), by C. J. Irving, 278;
Discussion 313, 314, 315
The local treatment of flotation concentrates in the Transvaal, South Africa, by D. D. Stitt
and N. B. Locke, 138; Discussion, 155, 157
The production of both coking and steam coals from the Witbank coal field, by L. A. Bushell,
S. B. Gass, F. W. Quass, and R. F. J. Teichmann, 45; Introduction 185; Discussion .
The spinning of zinc ribbon from ingot zinc for use in extractor boxes in the reduction
works at Government Gold Mining Areas, Limited, by J. C. Phillips, 119; Discussion, 120

YEAR 1946—1947

Combustion tests on South African anthracite and coal, by F. W. Quass 1, Discussion .
Geophysical prospecting for water in the dolomite, by O. Weiss, 155. Discussion 161, 162 .
Industrial synthesis of dichloro-diphenyl-trichlorethane and ancillary operations at the
Chemical Defence Factory, Northrand, by Wm Bletch, 333. Discussion 387, 388 .
Presidential address—Aspects of organization in the Witwatersrand gold mining industry
with special reference to labour, by M. Falcon, 73. Discussion 91 . . .
Psychrometry and psychrometric charts, by A. W. T. Barenbrug, 393. Discussion 409, 410, 412 . .
Some experiments with tungsten carbide tipped drill steel, by J. H. Bloomsma, R. Ramsay
and O. Deane, 243. Discussion 275, 276, 277, 280 . . . . . .
Shaft pillars and shaft spaces, by G. Hildick Smith, 171. Discussion 197, 211, 213 .
The discovery and prospecting of a potential gold field near Odendaalsrust in the Orange
Free State, Union of South Africa, by A. Frost, R. C. McIntyre, E. B. Papenfus and
O. Weiss, 107. Discussion 133, 135, 137. Authors' reply to discussion . . .
The grindabilities of South African duff coals, by C. C. La Grange . . . . . . .
The treatment of gold ore containing pyrrhotite at the Sub Nigel, Limited, by Andrew King,
A. Clemence and H. E. Cross, 291. Discussion 297, 298, 453 . . . . . .
The use of an underfeed stoker applied to a new type of assay furnace, by E. A. D. Rubidge,
300. Discussion 311, 312 . . . . .
Washing plant for total run of mine ore at Rand Leases (Vogelstruisfontein) Gold Mining
Ventilation pressures—An analysis of the effects of natural and mechanical ventilation, by
R. A. H. Fluge-de Smidt, 440, Discussion 444 . . . . . .

YEAR 1947—1948

Air conditioning methods used at the Anaconda Copper Mining Company, U.S.A., by
A. S. Richardson 71, Discussion 76, 81, 334, 341 . . . . . . . .
Mining at depth on the Kolar Gold Field, South India, by A. W. T. Barenbrug, 256. Dis-
cussion 292, 295 . . . . . . . . . . . . . . . . . . . . . . . . . . . .
Notes on hydrogen ion control of alkalinity in cyanide solutions, by H. E. Cross 338.
Discussion 340 . . . . . . . . . . . . . . . . . . . . . . . . . . . . .
Notes on slime residue and tailing dams, by R. J. Westwood 224. Discussion 239, 240, 241
245
Potential treatment of complex silicates and iron-aluminium phosphate, by H. D. Bell .
Presidential Address—Modern metallurgical practice on the Witwatersrand, by A. Clemes
43, discussion 58, 61 . . . . . . . . . . . . . . . . . . . . . . . . . . . . .
Psychrometry and psychrometric charts Parts III, IV and V, by A. W. T. Barenburg 1, Discussion 85 248
Recovery of diamonds from used drill crowns, by A. Leibowitz and R. S. Young 391, Discussion 399 400
Sampling, graphical representation and block valuation of wide banded reefs, by J. C. Fourie 129, Discussion 143 146
Some aspects of mineral valuation in South Africa with appropriate references to mining taxation and the mining lease system, by L. W. Luttrell-West 157, Discussion 195, 199, 203, 207 373
The application of small amplitude high frequency vibratory motion to certain types of ore dressing equipment, by P. T. Bruhl, E. R. Rudolph and L. Taverner 343, Discussion 360 363
The refining of gold, by D. Thomson 307, Discussion 325 326
The restoration of a steeply-dipping inclined shaft, by T. D. Salusbury 103, Discussion 107 107

YEAR 1948—1949  Vol. 49

Blast hole drilling at Nkana, 1944-1947, by O. B. Bennett 95
*Brief description of certain features of shafts and shaft lay-out—West Rand Consolidated Mines, Limited, by W. Scott 159
Determination of ventilation pressure loss in a rectangular shaft, by R. E. Campbell Pitt and R. A. Black 59
Electric smelting of iron ores for production of alloys, irons and steels and recovery of chromium and vanadium, by Dr Wm Bleloch 363
*Extraction of No. 6 Shaft pillar area, Durban Roodepoort Deep, Limited, by T. Mort and P. G. D. Pretorius 317
*Freddies shafts in the Orange Free State, Notes on, by W. S. Findlay 350
Glamour of gold, The, by Dr W. J. Busschau 411
Improved type of konimeter, An, by J. P. Rees and S. R. Rabson 85
*Movements of freely swinging plumb-lines in deep vertical shafts, by L. F. Browne 445
*Present and potential hoisting capacity of a vertical rectangular shaft at Rand Leases (Vogelstruisfontein) Gold Mining Company, Limited, by J. F. Reid 275
Presidential Address—Management in industry, by F. G. Hill 35
*Recent shaft sinking practice on the Crown Mines, by L. G. C. Wright 522
Science and the community, by Professor A. Findlay 1
*Shaft design and sinking practice of the Anglo American Corporation, by H. MacConachie and J. B. Mudd 165
*Shafts of the New Consolidated Goldfields Group, by Dr J. T. McIntyre and colleagues 197
*Sinking No. 3 Incline Shaft, St. Helena Gold Mines, Limited, by R. H. McWilliam 291
*Sinking of No. 5 Shaft, Van Dyk Consolidated Mines, Limited, by T. L. Blunt 179
*Sinking of No. 6A Shaft, Durban Roodepoort Deep, Limited, by G. H. Duggan 477
*Surface vertical shaft of the Blyvooruitzicht Gold Mining Company, Limited, and supplementary data, by E. C. Airth and John Dolan 427
*Trends in shaft design and some ancillary problems, by F. G. Hill 555

*Papers forming part of the Symposium on shafts and shaft sinking.

*Note: The table above lists abstracts from various articles published in the Journal of the South African Institute of Mining and Metallurgy from 1949 to 1952.*
Some problems in the control of pressure bursts in mining operations, by C. J. Irving  

Titanium—A critical review with special reference to the utilization of South African resources, by J. J. Frankel, A. M. Schady and D. J. du Plessis  

The thermal constants of some rocks from the Orange Free State, by S. C. Mossop and G. Gafner  

The effect of variations in the moisture content on the float and sink analysis of large coal, by W. H. D. Savage and B. van Eck  

Flotation of pyrite from cyanide residue in acid mine water, by J. E. Clay and Philip Rabone  

Report of tests carried out on the swing hammer pulverizer, by C. E. Bird  

A statistical approach to some basic mine valuation problems on the Witwatersrand, by D. G. Krige  

Chromite investigations—Part III, by J. F. de Wet  

The banded constituents of coal and their agglutinating curves, by E. P. Reim  

A review of the ventilation of some deep mines (Witwatersrand Gold Fields), by M. Barcza  

The functions of the Government Metallurgical Laboratory, by Prof. L. Taverner  

The treatment and recovery of refractory diamonds, by R. G. Weavind  

A modified form of thermal precipitator, by P. H. Kitto and D. G. Beadle  

The treatment and recovery of refractory diamonds, by R. G. Weavind  

A statistical analysis of some of the borehole values in the Orange Free State Goldfields, by D. G. Krige  

The settlement of underground mine waters of the Witwatersrand, by F. C. Johnson  

A suggestion for preventing the condensation of steam on the ceiling of a compound kitchen, by R. A. Flugge-de Smidt  

Suggestion for the construction of a smelthouse on gold mines, by R. A. H. Flugge-de Smidt and C. C. la Grange  

The oxygen absorption characteristics of South African coals, by P. G. Sevenster  

The strength of metals, by A. H. Cottrell  

The thermal characteristics of some Transvaal serpentinite and the production of forsterite, by F. H. S. Vermaas  

Shaft sinking on the Virginia and Merriespruit Mines, by T. F. Muller and C. Skeen  

The application of the liquid-solid cyclone as a classifier in closed-circuit grinding at Rand Leases (V) Gold Mining Company Limited, by M. J. Dennhy and S. K. de Kok  

Practical aspects of recent physiological studies in Witwatersrand Gold Mines, by C. H. Wyndham, W. van der M. Bouwer, H. E. Paterson and M. G. Devine  

New developments in nuclear physics, by Dr. S. J. du Toit (Visitor)  

Presidential address—The importance of outside mining in Southern Africa, by M. C. G. Meyer  

Symposium on diamond drilling (see next page for List of Papers)

Calculation of friction losses in mine airways, by J. T. M. Taylor ........... 1
A micro-analytical method for the determination of boron in coal, by F. H. Kunstmann and J. F. Harris .......... 12
The properties of a dust sample which should be measured, by D. G. Beadle .......... 25
A photo-electric apparatus for assessing dust samples, by D. G. Beadle .......... 30
Note on the use of the air ventilating a mine to produce cooling, by J. P. Rees ........ 40
Electrolytic recovery of diamonds from used drill crowns, by D. A. Benfield and K. G. A. Strachan ............... 43
An investigation into the problem of rock bursts. An operational research project: Part I: The approach to the problem and analyses of the rock bursts that have occurred on the E.R.P.M. during the years 1948-1953, by F. G. Hill ........ 63
An investigation into the problem of rock bursts. An operational research project: Part II: An analysis of the problem of rock bursts in deep level mining, by Drs A. J. A. Roux and H. G. Denkhaus .......... 103
The distribution of stress round cylindrical openings, by Professor J. C. Jaeger .......... 125
Theory underlying temperatures in horizontal airways, by Dr G. G. Wiles .......... 133
Heat flow studies using an electrolytic tank, by Dr G. G. Wiles and D. F. H. Grave .......... 149
The final clean-up of the reduction plant of the Modderfontein Deep Levels, Ltd., by H. Britten .......... 159
Non-assayable gold—a fallacy, by W. A. Sinclair .......... 168
The introduction of tungsten carbide-tipped rock drill steel and its effects on production on Vogelstruisbult Gold Mining Areas, Ltd., by W. L. Cousens and E. Veres .......... 179
Mechanised sinking of No. 2 Shaft Vilakfontein Gold Mining Company, Limited, by A. J. Cundill .......... 195
Why fuel research in the "atomic age?" by Dr A. J. Petrick .......... 223
Air conditions in hot mines, by V. O. Steed .......... 261
Presidential Address—Recent progress in the design and operation of gold reduction plants, by H. Britten .......... 313

The occurrence of germanium in South African coal and derived products, by F. H. Kunstmann and J. C. Hammersma .......... 11
A six months survey of the two-stage acclimatization method as applied at Simmer and Jack Mines, Ltd., by N. B. Strydom, J. F. Morrison, J. Booyser and J. Peter .......... 43
An investigation into the resistances to airflow of No. 5 Shaft, City Deep, Limited, by M. Barca, M. J. Martinson and G. S. Payne-Mercier .......... 49
Some applications of the hydro-cyclone in the base metal mining industry of Northern Rhodesia, by H. N. Hepker .......... 89
The liquid-solid cyclone as a classifier in a tertiary tube-milling circuit, by C. G. Peachey .......... 107
A further study of the hydraulic cyclone, by D. F. Kelsall .......... 125
Some notes on the use of the hydro-cyclone on mines of the Anglo Transvaal group, by S. K. de Kok .......... 159
The practical application of hydro-cyclones in milling circuits on sundry gold mines, by R. J. Adamson and J. H. Mortimer .......... 169
Difficult classification problems solved with the Dutch State Mines cyclone, by R. E. Hochscheid .......... 197
The cyclone as a gold concentrator, by J. H. French .......... 205
A statistical examination of the performance of the thermal precipitator, by D. G. Beadle and J. E. Kerrich ........................................... 219
The examination of dust samples under the microscope, by D. G. Beadle .................. 240
Pressing and sintering metal powders, by G. R. Bell .................................................. 259
A review of the symposium on 'Recent developments in the use of hydro-cyclones in mill operation', by S. K. de Kok ................................................................. 281
Notes on the application of hydro-cyclones on the West Rand Consolidated Mines Limited, by J. A. Arthur ................................................................. 295
The value of water drainage in up cast mine shafts and fan-drifts, by J. de V. Lambrechts .. 307
Notes on fan pressures, by R. A. H. Flugge-de Smidt ................................................ 325
The future of the graduate mining engineer in South Africa, by Professor R. A. L. Black .. 341
Ignitercord: Its development and uses as an aid to safety and improved blasting, by P. Lamboooy and R. Oxley-Oxland .................................................. 359
The establishment of new gold mining ventures with particular reference to the Virginia and Merriespruit mines in the Orange Free State, by T. F. Muller .................................. 397
Notes on gold amalgam crystals, by J. J. Frankel ........................................................ 451
Chrome investigations—Part VI: The vanadium content of Transvaal Chromite, by J. F. de Wet ................................................................. 457

YEAR 1956—1957

Presidential Address—Metals and megawatts in South-Eastern Africa, by Wm Bleloch .... 19
Some aspects of development, by R. R. M. Couzens ................................................ 67
An investigation of the operation of a travelling grate coker stoker owned by Rand Carbide, Limited, by C. C. la Grange .................................................. 99
An historical review of the events and developments culminating in the construction of plants for the recovery of uranium from gold ore residues, by Professor L. Taverner .... 125
The development of methods for the chemical determination of uranium, by T. W. Steele .. 144
A mineralogical approach to the development of the uranium extraction processes practised on the Witwatersrand, by W. R. Liebenberg ........................................... 153
Concentration tests on the gold uranium ores of the Witwatersrand for the recovery of uranium, by J. Levin ................................................................. 209
Technical and economic considerations in the planning of circular shaft sinking and layout, by S. C. Newman ................................................................. 255
Development of the extraction process for uranium from South African gold uranium ores, by Professor A. M. Gaudin, R. Schuhmann Jr. and J. Dasher ......... 287
The development of the acid leaching process for the extraction and recovery of uranium from Rand cyanide residues, by P. A. Laxen and M. G. Atmore ................................ 359
The history of the development of the ion exchange process as applied to uranium extraction, by R. E. Robinson and R. G. Velthuis ......................................... 376
A review of uranium leaching practice in South Africa, by E. T. Pinkney ..................... 386
The supply of the raw material requirements of the uranium programme, by D. N. Stuart ... 403
Flotation of uranium and pyrite at Vogelstruïsbult Gold Mining Areas Limited, by F. O. Read, E. A. D. Carman and C. L. M. Gough ........................................... 419
The use of the ion exchange process in the extraction of uranium from the Rand ores with particular reference to practice at the Randfontein Uranium Plant, by D. E. R. Ayres and R. J. Westwood ........................................... 459
Some features of joint uranium production schemes, by D. L. Carson ......................... 525
The final treatment and evaluation of uranium concentrates, by M. G. Atmore ............ 535
Laboratory control of the uranium, acid and flotation plants at the Virginia O.F.S. Gold Mining Company Limited, by L. B. Richards ... 544
National aspects of the uranium industry, by R. B. Hagart ... 565
Basic principles of uranium plant design, by S. Craib and D. G. Maxwell ... 591
Determination of the viscosity of unstable industrial suspensions with the aid of a Stormer viscometer, by P. J. van der Walt and A. M. Fourie ... 709
The Phoenix hydro-cyclone, by P. Rabone ... 724

PAPERS AND NOTES READ BEFORE THE BASE METALS DIVISION

Base Metal Industries in the Union of South Africa—A review and a prospect, by Wm Bleloch ... 87
Isothermal transformation in relation to heat treatment of steel, by C. E. Mavrocordatos ... 305

YEAR 1957—1958

Presidential Address—Mechanization in mining, by Herbert Simon ... 23
De-Stressing: A means of ameliorating rockburst conditions:
  Part I: The concept of de-stressing and the results obtained from its application, by A. J. A. Roux, E. R. Leeman and H. G. Denkhaus ... 101
  Part II: Implementing de-stressing with a discussion on the results so far obtained, by F. G. Hill and R. P. Plewman ... 120
Responsibility costing and budgetary control, by J. N. Morgan ... 147
The occurrence of titanium in South African coals, by F. H. Kunstmann and S. B. Gass ... 165
On the size distribution of airborne dust, by H. S. Sichel ... 171
The microscopical examination of coal and coke, including some physical tests relating to coking properties, by B. Moodie ... 271
Report on accident on St. Helena Mine, by R. A. H. Flugge-de Smidt ... 302
New developments in the operation of a gold reduction works, by A. H. Mokken ... 307
A review of progress in mechanization in the mining industry of Southern Africa during the last decade, by R. A. L. Black ... 345
Mechanization in coal mining as applied to Sigma Colliery, by C. J. Wantenaar ... 362
Chemicals from atmospheric nitrogen, by Dr W. C. Walmsley ... 415
Improvement in plant practice and labour utilization at Rhokana Corporation Limited, by O. B. Bennett ... 457
A brief history of the progress of efficiency in South African collieries in the last seventy years, by R. W. Grout and R. L. Lechmere-Oertel ... 485
Shaft sinking at Free State Saniplaas Gold Mining Company Limited, by G. A. Merricks and M. H. Thompson ... 515
Trends in development practice in South Africa in the past ten years, by D. M. Jamieson ... 555
Earthmoving in the diamond mines of Southern Africa, by C. P. A. Louwrens ... 563
The recovery of diamonds from prospection samples, by R. G. Weavind and A. A. Linari-Linholm ... 635

PAPERS AND NOTES READ BEFORE THE BASE METALS DIVISION

Some metallurgical aspects of welding stainless steel, by F. A. Ball and J. Hinde ... 83
The role of metallurgy in atomic energy technology—
  Part I: A. Blainey ... 226
  Part II: A. Blainey ... 609
Presidential Address—The ventilation of gold mines in South Africa: Achievements of the past and problems of today, by M. Barca 25
Sinking No. 2 Shaft, Harmony Gold Mining Company Limited, by S. C. Newman 71
Tests on an experimental underground bulkhead for high pressures, by W. S. Garrett and L. T. C. Pitt 123
Mine ventilation and efficiency, by B. J. R. Botha and J. A. Northcott 144
Progress towards improved efficiency in mines of the Lonrho Group—Southern Rhodesia, by T. D. Salisbury 153
T. D. Salisbury 153
Continuous borer operation at Coalbrook North Colliery, by W. W. S. Lorimer 169
Mining procedure and method at the C.D.M., by S. W. Devlin 184
The determination of the extent of fracture of rock faces by sonic means, by M. E. Szendrei and J. P. A. Lochner 202
A study of the relationship between development values and recovery grades on the South African goldfields, by D. G. Krige 317
Wet-bulb temperature gradients observed in horizontal airways, by G. G. Wiles 339
Some temperature gradients observed in specially selected underground airways, by G. G. Wiles and J. H. Quilliam 360
The application of square wave polarography to the monitoring of the uranium content of uranium plant solutions, by E. Goldblatt 369
Long hole drilling in development and stoping in narrow reef mines, by J. A. Nixon 385
The experimental determination of the extent and degree of fracture of rock faces by means of an ultrasonic pulse reflection method, by A. Lutsch 412
The pioneering of trackless mechanized coal mining in South Africa, by T. F. Muller and J. C. Fourie 445
Quality control of routine mine assaying and its influence on underground valuation, by C. H. Coxon and H. S. Sichel 489
Shaft sinking practice in South Africa, by H. MacConachie 569
Shaft planning for mines in the New Consolidated Gold Fields Group, by D. M. Jamieson and M. F. Pearse 596
The radioactive analysis of naturally leached uranium-thorium ore samples: Comparison of different methods, by P. W. de Lange 640

PAPERS AND NOTES READ BEFORE THE BASE METALS DIVISION

The role of the metallurgist in the production and usages of austenitic manganese steel castings, by B. Needleman 229
Corrosion research in Great Britain and its results, by W. E. Ballard 623

Presidential Address—Some account of diamond-winning practices in Southern Africa, by R. J. Adamson 23
Pre-grouting at No. 2D Shaft, President Brand Gold Mining Company, Limited, by R. A. Mudd 83
Development of a resin-in-pulp process for the extraction of uranium from acid-leached pulps, by F. O. Read 105
The development and commissioning of the heavy minerals separation plant at Umgababa, South Coast, Natal, by I. F. Cairns and G. Langton

Statistical quality control of routine underground sampling, by R. St. J. Rowland and H. S. Sichel

The regeneration of cobalt-poisoned ion-exchange resins and their subsequent performance in a uranium plant, by E. A. Nugent, P. Hoogervorst and R. E. Wheeler

The automatic control of grinding medium in pebble mills, by J. E. Williamson

Education and training in the mining industry, by R. A. L. Black

The colorimetric determination of minute quantities of gold by means of O-Tolidine, by E. Frankel

The colorimetric determination in merrill tail solutions at Hartebeestfontein Gold Mine, by C. R. Pugh and H. T. Tucker

Analyses of ashes of South African coals, by F. H. Kuntsmann, L. B. Bodenstein and S. B. Gass

Block-caving practice at De Beers Consolidated Mines, Limited, by W. S. Gallagher and W. K. B. Loftus

The treatment of gravels for the recovery of diamonds at C.D.M., by S. W. Devlin

Diamond recovery plant, State Alluvial Diggings, Alexander Bay, by D. B. Smit, N. Ormond and J. E. de Lange Strydom

Native administration in the Kimberley Diamond Mines, by W. S. Gallagher, J. S. Sandilands and T. V. Howell

Treatment and recovery practice at Kimberley Mines of De Beers Consolidated Mines, Limited, by C. Colvin and H. S. Simpson

The promotion of a vegetative cover on mine slimes dams and sands dumps, by D. Chenik

Opening address to the symposium ‘Modern practices in diamond mining in Southern Africa’, by G. S. Giles

Some thoughts and reflections on the training of metallurgists, by C. E. Mavrocordatos

Education and training of learner officials, by O. Ll. Richards

Apprentice training in the industry, by F. E. Malherbe

The training of a foreman in a chemical industry, by C. d’C. Murray

Testing diamond drill bits under controlled conditions, by R. G. Weavind and G. B. Dauncey

A resin-in-pulp process using a floating resin technique for extracting uranium from acid-leached pulp, by E. H. D. Carman

PAPERS AND NOTES READ BEFORE THE BASE METALS DIVISION

Some thoughts on metallurgy in South Africa. The past and the future, by D. Gordon-Jones (Chairman’s Address to the Base Metals Division)

Fatigue from a metallurgical point of view, by O. E. Lissner

Cemented hard metals, their basis with particular reference to the tungsten-carbide cobalt system, by H. H. Doeg

The removability of oxide scale from steel plate, by F. K. Peters

Fracture of ductile steel without measurable deformation. (Brittle fracture and temper brittleness), by C. E. Mavrocordatos

YEAR 1960—1961

Presidential Address—Research in the South African gold mining industry, by W. S. Findlay

Mining practice at the Premier Diamond Mines, by H. F. Hodgson and E. J. B. Sewel
Treatment plant and diamond recovery at the Premier Mine, by R. I. Shanks 90
Native labour and payment on Premier Diamond Mine, by E. J. B. Sewel 110
An approximate determination of the shear strength of some Witwatersrand quartzites, by W. D. Ortlepp 137
The elimination of nitrous fumes from blasting gases, by S. R. Rabson, J. H. Quilliam and E. Goldblatt 152
The stability of slimes dams in the gold mining industry, by W. G. Donaldson 199
The technical training of Native miners at Randfontein Estates Gold Mine, by P. Morkel 205
On the departure of ore value distributions from the lognormal model in South African gold mines, by D. G. Krige 231
Reagents in pyrite flotation, by T. Zadkin and R. Doig 284
Mining a vertical kimberlite fissure at Star Diamonds (Pty.) Limited, by H. F. Allen 310
Training of supervisors in mines of the General Mining and Finance Group, by C. P. Linsell 319
Modification of a diaphragm jig to treat large tonnages of diamond-bearing kimberlite, R. G. Weavind and D. F. C. McLachlan 325
Training of officials in the Anglo-Transvaal Group, by J. L. van Eyssen 342
Trends in management training, by G. F. Jacobs 351
A critical review of the methods of training engineering personnel on the gold mines, by A. W. P. Hallett 371
The role of the technical college in education for the mining and metallurgical industries, by A. W. Rowe and D. C. Steyn 392
Inaugural Address to the Seventh Commonwealth Mining and Metallurgical Congress, by C. S. McLean 410
The role of jigs in modern ore dressing, by F. A. Williams 443
The treatment of tin ores in the Rooiberg concentrator, by R. C. M. van der Spuy 468
An investigation into the design of underground settlers, by J. W. de Villiers 501
Recovery of lead from zinc plant residues by brine leaching and electrodeposition, by D. D. Marsden 522
A correction to be applied when calculating the surface area of dust samples, by A. D. Joffe 562

PAPERS AND NOTES READ BEFORE THE BASE METALS DIVISION

Chairman’s Address to the Annual General Meeting, by B. Needleman 252
Works practice in the manufacture of non-ferrous extruded and rolled products, by J. N. Morris 264
The design of electric reduction furnaces for ferro-alloy production, by J. J. Coetzee 541

YEAR 1961—1962

Presidential Address—Minerals and metals for sale, by D. G. Maxwell 23
Diesel-engined dump trucks for underground transportation of coal at Witbank Consolidated Coal Mines, by E. P. Edwards and A. W. L. Breerton 67
The economic aspect of reducing shaft resistance, by A. W. T. Barenbrug 111
The effect of equipment changes in existing shafts, by B. J. R. Botha and S. G. Taussig 120
Ventilation resistance factors of some vertical downcast shafts in the Rand Mines Group, by M. Barcia and M. J. Martinson 134
An investigation into the effectiveness of blasting explosives in short drill holes with special reference to holes of different diameters:

Part I: P. J. Blignaut and D. J. Vermeulen 165

A note on coagulation and settlement of underground mine waters—Laboratory tests on the effect of varying the reagent dosages, by D. D. Marsden

The measurement of stress in rock by E. R. Leeman

An analogue solution for determining the elastic response of strata surrounding tabular mining excavations, by M. D. G. Salamon, J. A. Ryder and W. D. Ortlepp

The investigation of strata movements when mining three thick coal seams in one area, by C. G. Swivyll and K. Tubb

The effect on strata behaviour of two support systems:
(a) Hydraulic props with caving;
(b) Waste packing, by D. D. Deacon, R. B. Sutherland and R. H. Swan

The elastic analysis of observed strata movement by means of an electrical analogue, by W. D. Ortlepp and A. Nicoll

The application of the fluosolids reactor to the pyrometallurgical beneficiation of South African chromite, by P. R. Jochens and D. D. Howat

The measurement of stress in rock—Part III, by E. R. Leeman

Elastic analysis of displacements and stresses induced by mining of seam or reef deposits, Part IV (Inclined Reef), by M. D. G. Salamon

The determination of osmiridium in Witwatersrand ores, by J. E. Williamson and J. A. Savage

The water content of floes, by K. J. Scott

A rockbolting experiment in a footwall haulage at Hartebeestfontein Gold Mining Company Limited, by R. F. Taylor and P. P. Venter

A comparison of the use of compressed and of liquid oxygen in closed-circuit respiratory equipment employed in mine rescue operations, by J. F. Morrison, C. H. Wyndham and J. J. Franken

Non-contact technique for studying drill rod motion of pneumatic rockdrills, by E. C. H. Becker and B. J. R. Botha

A note on rockbursts considered as a problem of stability, by N. G. W. Cook

The design of a centrifuge for the simulation of gravitational force fields in mine models, by E. Hoek

Control of acidity of tailings dams and dumps as a precursor to stabilization by vegetation, by A. L. James and M. Mrost

A nonlinear continuum approach to the problem of fracture zones and rockbursts, by F. H. Deist

Dropping down to a new block cave level at Jagersfontein Mine, by H. J. Stucke

The queue in mining. Application of the queueing theory, by B. Kerns

The spectrographic determination of tin in low-grade tin ores, by K. A. Murray and J. F. Maritz

Note on the accuracy of fire assaying, by K. A. Murray, G. M. Fleming, H. A. James and J. F. Maritz

A review of the research work that has been done in the field of rock mechanics and of the practical benefits that have been derived, by F. G. Hill

The effect of variable residence time on the performance of a flotation system, by E. T. Woodburn and B. K. Loveday

The grindability and abrasive properties of South African coals, by A. A. Meintjes

PAPERS AND NOTES READ BEFORE THE BASE METALS DIVISION

A review of the progress of copper, by J. N. Morris (Chairman's Address)

Heat treating steels for maximum strength, by G. T. van Rooyen

YEAR 1965—1966

Vol. 66 Page

The effects of finite velocities of detonation and propagation on the strain pulses induced in rock by linear charges, by R. P. Plewman and A. M. Starfield.

An elementary analysis of the displacements generated in rock by a linear explosive charge, by G. A. Wiebols and N. G. W. Cook.

A survey of the causal factors in heat stroke and of their prevention in the gold mining industry, by C. H. Wyndham.

Note on the performance of the Witwatersrand konimeter, by J. E. Kerrich.

A gold mine management game, by J. M. Pike, P. C. Pirow and R. T. Rozadowski.

The coal mining industry in Western Germany, by W. Reerink.

An investigation aimed at improving the efficiency of drilling rock by percussion drilling, by V. F. Long.

The production of high purity uranium at a South African gold mine, by A. Faure and co-authors.

Amine solvent extraction of uranium from sulphuric acid eluates, by E. L. Goldblatt.

An analysis of the load compression characteristics of conventional chock packs, by E. Margo and R. K. O. Bradley.

Recent changes in practice in the reduction works at St. Helena Gold Mines Ltd., by D. A. Viljoen.

Merrill clarification and stellar precipitation at the Harmony Gold Mining Company Ltd., by R. Cross.

Gold smelting with the electric submerged arc furnace, by H. J. Stockden and J. McLean.

The use of concrete for stope support on Harmony Gold Mining Company Ltd., by A. C. Petersen and R. C. Botha.

Tables for the flow of heat into a rock tunnel with different surface heat transfer coefficients, by A. M. Starfield.

PAPERS AND NOTES READ BEFORE THE BASE METALS DIVISION

A review of some cast abrasion resistant materials and their application, by W. M. Wedderburn (Chairman's Address).

The galvanizing process and the testing and inspection of galvanized coatings, by J. van Heerden.

A review of the usage of aluminium and its alloys in the mining industry, by G. J. Metcalfe.

YEAR 1966—1967

Presidential Address—The contribution of chromium and nickel to 60 years of progress in metallurgy, by D. Gordon Jones.

The physical metallurgist in the mining industry, by A. M. Rose.

The application of neutron activation analysis to sorting Witwatersrand gold-bearing ores, by E.-A. Uken, J. I. W. Watterson, A. Knight and T. W. Steele.

The determination of the heat load on labourers when near submerged arc furnaces, by J. F. Morrison, D. Mitchell and N. B. Strydom.

An investigation of the applicability of zircon-size as a parameter for indicating pay trends in certain Witwatersrand reefs, by J. L. Bosch and R. J. Ortlepp.
Slope stability at the open pit of Nchanga Consolidated Copper Mines Limited, by O. K. H. Steffen and H. L. Klingman .......................................................... 140

Geological considerations as an aid to statistical borehole valuations of the Venterspost Contact Reef, by H. Truter .......................................................... 172

Planetary mill, by D. B. van der Schyff ........................................... 317

The pioneering of fully mechanized longwall coal mining in South Africa, by R. T. Naude and M. J. Deats ...................................................... 322

Notes on the effect of a heavy water inflow into a ventilation shaft, by S. G. Taussig and T. A. du T. Burger .............................................. 359

Note on the determination of gold in barren cyanide solutions by atomic absorption spectroscopy, by V. C. O. Schuler ........................................... 362

The use of methane detectors to indicate the presence of hydrogen, by M. Mrost and J. D. Greig .......................................................... 367

The photography of underground cavities, by L. R. P. Butler and P. L. V. Hugo .......................................................... 372

The calculation of heat exchange between air and wet surfaces, by A. Whillier .......................................................... 396

A note on the design of two triaxial stressmeters, by C. Grobbelaar .......................................................... 403

Further developments in open pit mining at Nchanga, by R. V. C. Burls and W. Holt ...................................................... 421

The treatment of refractory copper ores by the segregation process, by E. T. Pinkney and N. Plint .......................................................... 559

Prediction of wet-bulb temperature gradients in mine airways, by J. de V. Lambrechts ...................................................... 595

The application of economic production charts to mine production scheduling, by B. J. Taylor and A. M. Anderson ...................................................... 611

The use of igniter cord and safety fuse in sequential firing, by L. E. Trollip, R. C. Espley-Jones, C. M. Ehmsie, J. J. Lesting and S. J. Bezalek ...................................................... 646

Corrosion as a factor in the wear of tube-mill liners, by I. D. Dirmeik and J. D. Greig ...................................................... 684

Presidental Address—The role of explosives in mining in Southern Africa, by P. Lambooy ...................................................... 22

A study of the strength of coal pillars, by M. D. G. Salamon and A. H. Munro ...................................................... 55

A method of designing bord and pillar workings, by M. D. G. Salamon ...................................................... 68

An examination of certain individual factors affecting the heat tolerance of mine workers, by C. H. Wyndham and N. B. Strydom, C. G. Williams and A. J. A. Heyns ...................................................... 79
The tolerance of acclimatized men at rest and at work of very high temperatures and humidities, by C. H. Wyndham, C. G. Williams, J. F. Morrison and A. J. A. Heyns.

An analysis of comminution kinetics in terms of size distribution parameters, by Dr B. K. Loveday.

Notes on the operation of a two-stage ferrochrome silicide process, by H. R. Reid.

The manufacture, application and testing of springs in General Motors South African (Pty.) Ltd., by F. J. Becker.

The origin of solids collected in refrigeration plant water circuits at Western Deep Levels Ltd. and at Vaal Reefs Exploration and Mining Co. Ltd., by D. J. Bosman and D. D. Marsden.

A study of heat transfer and moisture pick-up in mine airways, by Dr A. M. Starfield and A. J. Dickson.

An investigation of possible methods of preventing loss of gold ore caused by excalation of the pay limit, by D. R. Fleming.

Some aspects of metallurgical work on the South African Railways, by M. N. Heller.

An anthropometrical survey of Bantu mine labourers, by J. F. Morrison, J. J. Bettencourt, J. H. Viljoen, Dr C. H. Wyndham and Dr N. B. Strydom.

A process for the production of high-grade vanadium pentoxide from solutions containing chromium and silica, by W. D. Douglas, H. J. Bovey and D. A. Temple.

The recovery of vanadium pentoxide at Transvaal Vanadium (Pty.) Ltd., by A. L. Guise-Brown and M. G. Atmore.

Some implications of the new assistance formula for South African gold mines, by Dr D. G. Krige.

Note on in situ testing of the strength of coal pillars, by Dr Z. T. Bieniawski.

Some aspects of electrolytic gold refining as applied to South African mine bullion, by F. E. Statham, T. J. Coyle and Prof D. D. Howat.

Vibration milling tests at Durban Roodepoort Deep Ltd., by A. J. Echalaz.

Determination of the regional stress field from 'doorstopper' measurements, by F. Bonnechère and C. Fairhurst.

Fundamentals of explosive rockbreaking in narrow stopes, by K. Hodgson.

Changes in tungsten carbide-tipped drill steel and drilling practice likely to result from the introduction of Anflex, by R. P. M. Holliday.

YEAR 1968—1969

Presidential Address—The Institute—in retrospect and prospect, by R. C. J. Goode.

Prediction of the cooling rate of the human body, by A. Whillier and D. Mitchell.
NOTICES

SYMPOSIUM ON STAINLESS STEELS

This symposium, being held at The President Hotel, Johannesburg on 9th-11th September, 1969, is being jointly sponsored by The South African Institute of Mining and Metallurgy, The South African Corrosion Council and the Southern Africa Stainless Steel Development Association, and supported by the C.S.I.R.

The three days of technical sessions, at which 350 delegates are expected, will include introductory films on the properties and uses of stainless steels, papers on corrosion problems and prevention, design and economics, welding and applications in industries of particular importance to South Africa. The programme includes four overseas guest speakers who are acknowledged leaders in their respective fields.

Detailed programmes together with application forms for registration will be published shortly. Enquiries to P.O. Box 8954, Johannesburg.

SYMPOSIUM ON THE RECOVERY OF PYRITE

You are reminded that a symposium on the recovery of pyrite will be held at Kelvin House, Johannesburg on 12th and 13th June, 1969. This symposium is being jointly sponsored by The South African Institute of Mining and Metallurgy and the National Institute for Metallurgy.

There will be two days of technical sessions covering all aspects of pyrite which should prove stimulating and instructive. A detailed programme with a registration form has been sent to all members and you are reminded that these applications should be returned to the Secretary before 15th May, 1969. If you have not received this notification please contact the Secretary.
