

SAIMM in conjunction with Sulphuric Acid 2017 Conference is proud to announce the

Cost-efficient catalyst solutions – real-life case stories – Workshop

hosted and sponsored by Haldor Topsoe

9 May 2017

Cape Town, South Africa

**Only 60 seats
available!**

OVERVIEW

Haldor Topsoe will update the workshop attendees on topics spanning from hands-on experience from catalyst work to finding the right – and most cost-efficient – revamp solution for your plant, to the latest development in the area of sulfuric acid production to meet the market demands.

Special focus will be on the importance of finding the bottle necks in your plant and how to achieve optimal value by installing the catalysts in the right place of your converter. In addition, we will discuss the advantages of giving your installed catalyst the best conditions to meet your targets.

The attendees will be taught how our newest dynamic model simulation tool can be used to design catalyst solutions to overcome operations at non-steady state conditions and start-ups.

The presentations will include real-life case stories from the sulfuric acid industry, making this workshop a good opportunity to learn about other acid plants' challenges and to share experience among acid plant managers and operators.

WORKSHOP PROGRAMME

13:00–13:05	Topsoe welcome	14:30–15:00	Understand your acid plant during start-up and non-steady state operations—dynamic simulators, eliminating SO₂ emissions peaks during start-up
13:05–13:15	Workshop introduction	15:00–15:45	Hands-on experience—loading, unloading and screening of catalyst
13:15–13:30	Fundamentals – short introduction to sulphuric acid catalyst	15:45–16:00	Workshop wrap-up
13:30–14:15	Achieve optimal performance—right place, right catalyst, right conditions		
14:15–14:30	Coffee break
