MINING SOLVED

About SRK

- Leading global firm of engineers and scientists
- Serving mining, industry and the public sector for over 50 years
- Integrated approach with deep specialist expertise
- Experience in water, mining, environment, infrastructure and energy
- Independent and professional advice and studies across project life-cycle
- Ranked as 2019 Consultant of the Year by *Mining Journal*

Where we work

SRK Consulting (Africa) has its primary base in South Africa, with country offices in Ghana and the Democratic Republic of Congo. We service projects across the African continent and globally, drawing on our SRK network of 45 offices across all six continents.

How we work

We work collaboratively with clients to deliver optimal results that address your strategic priorities. Highly experienced experts from a range of disciplines work together in closely managed teams.

SRK is an independent company owned by its employees. This, combined with our world-class expertise, means reliable assessments, audits, investigations and advice.

We uphold global standards in all projects, while understanding and applying all in-country laws and regulations.

Solutions we offer in mining

- Strategy and advice – including exploration services, mining method, geotechnical & geological risk, tailings & mine waste management, stakeholder engagement and mine closure
- Design, engineering, resource management and monitoring –including mineral resource modelling & estimation, mine design, infrastructure design, mine planning & scheduling, mine water management and rehabilitation
- Studies and audits – including competent persons' reports, due diligence & project evaluation, engineering studies, environmental & social studies, gap analysis, financial modelling and independent reviews
- Compliance and authorisations – including environmental and social authorisations, funder requirements, rehabilitation & closures, social license to operate and legislative compliance

We can service a range of requirements from policy, strategy and organisational development, to specialist technical studies, planning, monitoring and authorisations. Our expertise includes exploration services, geotechnical and geological risk, resource modelling and estimation, mine and infrastructure design, mine planning and scheduling, tailings and mine waste management, rehabilitation and mine closure.

Awards

SRK Consulting has been recognised in a number of awards and rankings, including:

- Consultant of the Year (Mining Journal)
- IAP2 Project Alchemy Award
- The SAACE Glenrand M•I•B Excellence | Maguga Dam Awards
- Fulton Commendation | Civil Engineering | Maguga Dam Excellence in the use of Concrete Awards
- Impumelelo | SRK Consulting | Top Empowered Companies Award
- Top 500 Companies Awards – SRK is in South Africa's top five consulting engineering (mining and infrastructure firms)
- SA Global Company Awards
- Technology Top 100 Awards

Clients

Our clients include a range of private and public sector organisations:

- Major mining companies
- Banks and financial institutions
- Independent miners and explorers
- Industrial players in energy, aviation, petrochemical and other sectors
- National and provincial governments, as well as municipalities and metropolitan councils
- National, provincial and local government
- Regional organisations

Water

Our work in the water sector is in fields such as:

- Groundwater and surface water resource estimations
- Water management
- Water sustainability and risk
- Waste storage facilities
- Contamination assessments
- Stormwater and floodplain management
- Disaster management
- Water use licences and regulatory support

Contact: water@srk.co.za

ESG

Our work in the ESG sector is in fields such as:

- Environmental and social impact
- Stakeholder relationship management
- Biodiversity
- Climate change
- Air quality and rural development

Contact: enviro@srk.co.za

Infrastructure

Our work in the infrastructure sector is in fields such as:

- Civil engineering, roads and rail
- Township and housing development
- Waste management and stockpile storage
- Harbour, quay and jetty investigations
- Bulk earthworks and ground stabilisation
- Concept and feasibility studies
- Compliance audits, legislation and licences
- Project management and contract administration

Contact: infrastructure@srk.co.za

Energy

Our work in the energy sector is in fields such as:

- Energy efficiency solutions
- Power station infrastructure
- Risk and impact assessments
- Remediation
- Site selection and management
- Air quality management and monitoring
- Resettlement action plans
- Licences, permitting and regulatory compliance
