

APCOM 2021

# MINERALS INDUSTRY 4.0

The next digital  
transformation.  
in mining

30 AUGUST - 1 SEPTEMBER 2021

**APCOM** (Applications of Computers and Operations Research in the Minerals Industries) is a series of well-established, high-quality international scientific conferences which was started in the early 1960s with the aim of sharing technological advances by engineers and computer scientists in all fields relevant to the mining industry. The APCOM events have evolved to become a major driver of innovation in the minerals industry, and over the years, many breakthrough innovations, such as geostatistics and mining process

optimization, have been initially discussed at or originated from the APCOM conferences. One of the success factors of APCOM is the intensive, high-quality dialogue that it promotes between industry and academia. Thanks to the personal commitments of APCOM's loyal participants and supporters, the symposia continue to be a thriving success.

The APCOM 2021 Conference, the 40th in the series, will be an online conference from 30 August – 1 September 2021.
