

LANGER HEINRICH URANIUM MINE TECHNICAL VISIT

Date: 21 August 2026

ECOSA and SACNASP Validated CPD
Activity Credits = 0.1 per hour attended

Background:

Located approximately 90km east of Swakopmund, the Langer Heinrich Uranium Mine is once again producing uranium oxide after a successful restart project following 5 years of care and maintenance. Based on open cast mining in an ancient paleo channel, the ore is amenable to beneficiation followed by alkaline leaching and ion-exchange. Novel technologies such as nanofiltration for reagent recovery enable Langer Heinrich Uranium to be one of the lowest cost Uranium producers in Namibia.

PPE Requirements:

Steel capped safety shoes only.
Hard hats and reflector jackets will be provided.

Duration of the visit:

Half day – 08:00-12:00

Price:

R1000p.p
