Webinar

The benefits of consolidating your data to manage costs and reduce risks

29 September 2021

Register online
Time: 14:00-15:00

Cost: Free

0.1 CPD point awarded for this Webinar

KPMG conducted research within the Mining industry, and 64% of respondents agree that the industry needs to consolidate their data in order to manage costs & mitigate risks more effectively.

In this presentation, we will demonstrate how an effective consolidation of disparate systems that are brought together to deliver a single, real-time overview of the Mining operation, can not only address the ability to manage costs and reduce risk, but so much more.

Mi-C3

Presenters:

Glen Scott

CEO & Founder : Mi-C3 International

Glen is the visionary Founder, CEO and Executive Director of Mi-C3 International. An entrepreneur at heart, Glen has built a number of successful companies in the IoT space, Telematics, IT, Call Centre Support, Mining and various other sectors. His passion to help make organisations more effective through revolutionising the way they operate was the inspiration for Mi-C3's flagship product, Affectli, which he started developing 15 years ago.

Glen's enthusiasm for solving the world's problems through digitisation is palpable - and it's the key ingredient that drives this inspirational leader with passionate pragmatism.

Andre Scott

RedBridge: Head of Business Development

Andre joined Mi-C3 in 2017 and heads up the Global Business Development team, as well as manages Clients and Channel Partners across the African continent. He is a results driven executive with extensive experience in a number of industries within the large Corporate sector, including Telecoms. Andre leads his team with passion and a wealth of experience from his proven track record and outstanding achievements in growing market share in highly competitive environments.
